INSTRUCTION MANUAL

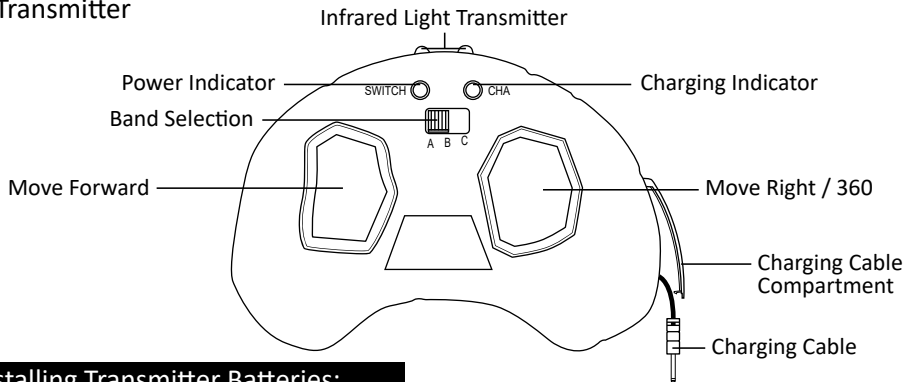

CONTENTS: 1x RC Rat 1x Transmitter 1x Manual

Parts Overview:

1. RC Rat

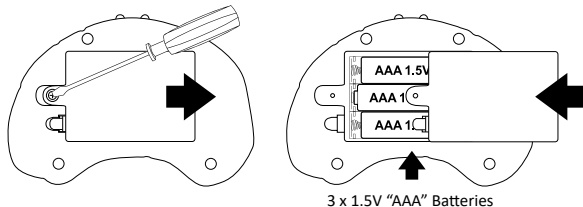

2. Transmitter

Installing Transmitter Batteries:

Using a screwdriver, remove the battery cover on back of transmitter and install 3 x 1.5V AAA batteries making sure that polarity is correct, do not install backwards or damage may occur.

1. Make sure that the batteries are correctly installed, do not reverse polarity.
2. Do not mix old batteries with new batteries.
3. Please do not use different types of batteries together.

Charging

1. Open the transmitters side compartment and pull out charging cable, connect to charging port on bottom of Rat.
2. Charging indicator light will turn on while charging, indicator will turn off when charging is complete, this will take approximately 30 minutes.
3. Unplug once charging is complete, do not charge overnight.

Operation

1. Select an unused band on transmitter if more than one RC Creature is being used.
2. Turn Rat power switch from "OFF" to "ON" and place on a flat level surface, eyes will light up and flash during operation.
3. Press on the forward button to move Rat forward, press again to stop. Press the Turn Right button to move Rat to the right and/or turn 360 degrees.
4. Turn Rat power off once operation is complete. Remove batteries from transmitter if not going to use for an extended period of time.
